

High power, 2 way line array column speaker is designed to limit vertical dispersion and focus directivity at the target listening area. It is a linear source made with 8 nos 4" speakers and 2 nos piezo tweeters mounted in close proximity. Ideal for long throw in places like auditoria, schools, churches, malls, parking areas, and other locations where distant reach is required, or the background noise level is high. The characteristic directivity of the long column should reduce unwanted reflections, limit feedback, and enhance sound clarity in reverberant spaces and difficult acoustic environments.

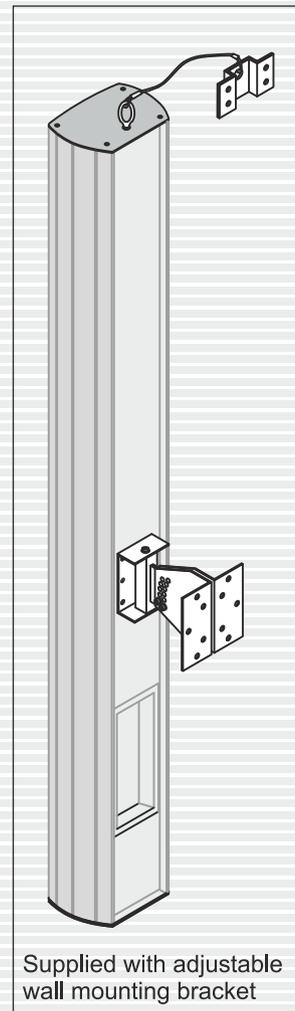

The high power rating of 200 watts enables highly audible and intelligible speech over long distances. The high quality speakers and 2 way design enables a wide frequency spectrum, and make this column also ideal for music. Can be used on its own or with a subwoofer for high end music programmes.

The housing is made from strong extruded aluminium section, combining fashionable good looks with strength and robustness. A sturdy wall mount bracket is supplied along with, allowing the column to be tilted at various angles.

Height 1260mm (1.26 Meters)

SPECIFICATIONS

INPUT POWER	200W RMS
CONFIGURATION	Two Way
FREQ. RESPONSE	100-20,000Hz
SPL at (1W/1m)	95dB
NOMINAL IMPEDANCE	8Ω
SPEAKERS	Woofer 8 × 101.6mm (4") Tweeter 2 × 85mm square piezo tweeter
DIMENSIONS	W150 × H1260 × D115 mm
WEIGHT (w/o bracket)	13.00kg

Supplied with adjustable wall mounting bracket
